

# **B2B Cloud Consulting and Technology Services**

**Helping SMMA  
and Dropshipping agencies  
take advantage of the **Cloud**.**

**Equipping Small and Medium  
businesses with the same tech  
solutions as the **Fortune 500**.**

# What is the **Cloud**, and why is everyone using it?

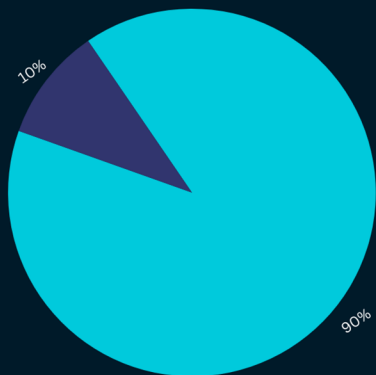

The cloud, simply put, allows us to utilize someone else's data center for our own needs, usually at a monthly cost.

Want to run a large database but don't want to maintain a data center? **Use the Cloud.**

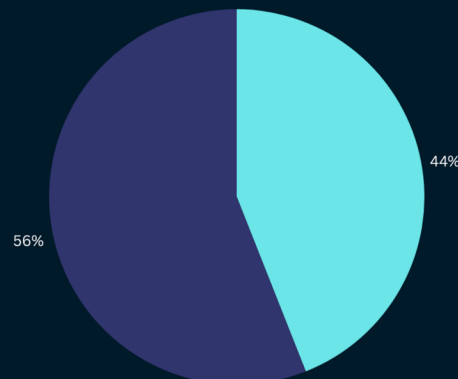

Want to send personalized emails to thousands of people at the same time? **Use the Cloud.**

Want a website but don't want to build and maintain a bulky server? **Use the Cloud.**

90% of Fortune 500 Companies  
Utilize Cloud Computing

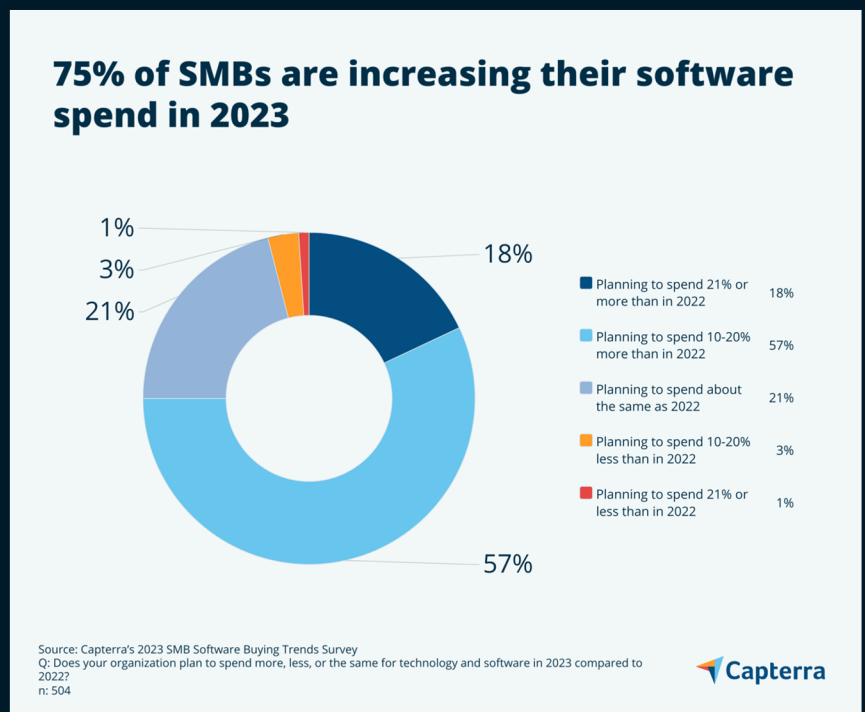

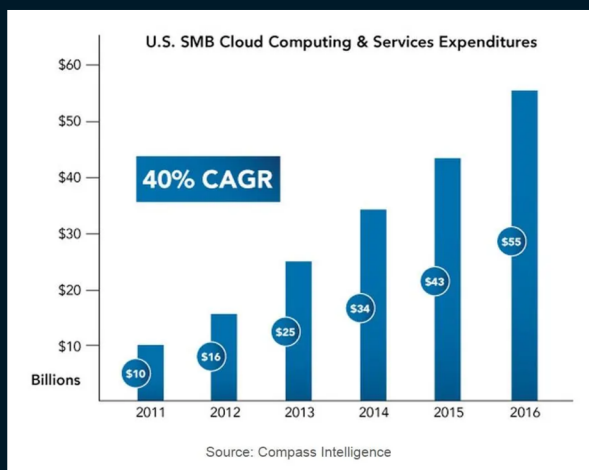

While only 44% of Small and  
Medium businesses do so

SMBs too however, are warming up to the cloud in recent years.

After all, leveraging the cloud allows them to run their operations at a larger scale and **compete with bigger players.**

All while avoiding the huge upfront costs and capital required to build massive data centers.

# Why choose CloudNerva?

We have hands-on experience building tech solutions for **15+** Small and Medium Businessness.

Our team consists of **AWS Certified** personnel with both technical and real-world business knowledge.

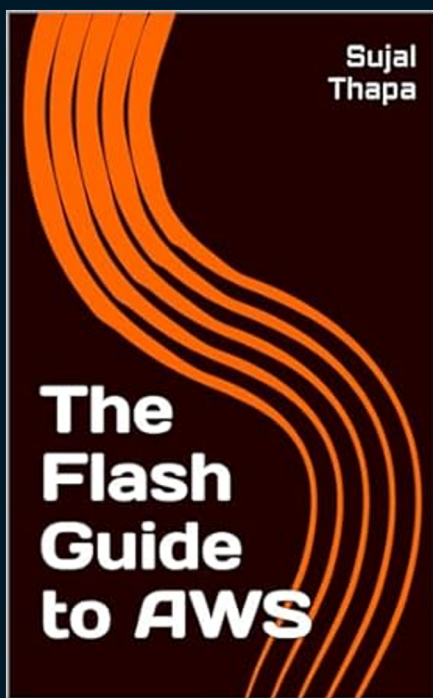

And finally, we are experts not only in the cloud, but also in **communication**.

Our agency believes that technology and business teams should work together, talking plainly, easily and honestly with one another.

We believe **simple is best**, and explaining to clients in simple words what exactly it is that they are spending money on, and what the expected outcomes are.

It was in this spirit that our Founder, Sujal Thapa **wrote a book** that lays out in plain english what AWS and its 200+ services have to offer.

A concise, quick, no-nonsense guide to AWS.

The book explores key concepts related to AWS and cloud computing, with deep-dives into 65+ major AWS services.

Written specifically for businesspeople and young professionals.

# What we're offering...

**Serverless Functions**

**Databases**

**Email Automation**

**AI Applications**

**Data Backup Solutions**

**And anything else tech-related**

Our agency is still in its early stages,  
but our services are **anything but.**
